# New Evita Infinity V500 for Critical Care Ventilation

Wide range of treatment options to manage the needs of most acutely ill patients

**Toronto, ON – Draeger Medical Canada, Inc. announced today that it has received a Canadian Medical Device License to market the Evita Infinity V500 in Canada. The ventilator is Dräger’s latest and most advanced product in its ventilator product line.**

The Evita Infinity V500 ventilator offers the latest technology in mechanical ventilation for critically ill or injured adult, pediatric, and neonatal patients. Its versatility and range of operation is well suited for acute care facilities as well as university medical centers.

The Evita Infinity V500 is a highly advanced ventilation unit for use in modern, acute care respiratory support. High-performance invasive and non-invasive ventilation, comprehensive monitoring and treatment functions, effective O<sub>2</sub>-therapy – the V500 delivers advanced care to patients of all ages and acuity levels, including neonates.

“The V500 was developed in consultation with key physicians and respiratory therapists alike to offer clinicians a wide array of ventilation therapies required for critical care. Improvements in daily workflow, safety in the ICU, ease of use, and patient comfort are all realized with this new ventilator,” said Robert Simms, RRT and modality manager for Respiratory Care Systems at Draeger Medical Canada, Inc.

With a company-wide focus to provide exceptional product support services, Dräger customers will continue to receive support from both our field support teams and Intensive Care Online Network (ICON).
